

FALCON FOODSERVICE EQUIPMENT

Professional Catering Equipment from the UK's leading brand

Marine and Offshore Products

E3101 OTC four hotplate range.
Setting the standard.

As a long-standing supplier to the marine and offshore industry, we understand more than most what it takes to deliver robust, reliable products that are suitable for harsh environments.

With SOLAS approval where appropriate, in addition to meeting international certification standards for performance and safety, products available include griddles, boiling tops, fryers, braising pans, grills, convection ovens and oven ranges.

Our equipment can be found in many marine locations. Previous installations include oil rig accommodation platforms, passenger ferries, cruise ships and Royal Navy destroyers.

Why Choose Falcon?

Product Specification

Constructed using 304 stainless steel, a typical Marine specification includes:

- Deck feet
- Anti-tilt shelves
- Storm rails
- Hand rails
- Voltage as required

Our technical back-up service and support sets us apart from competitors - with a dedicated helpdesk and field-based engineers, Falcon is able to offer the expertise that is required to keep your galley operating smoothly.

Being the leading UK manufacturer of high quality catering equipment, we also offer a fully comprehensive spares support package to allow onsite repairs.
